

Job Posting

Since 1997, TechR2 has been the leader providing solutions for data security to our clients by providing risk assessment, auditing, decommissioning and secure transport services to ensure data protection. We are looking for a fulltime **Systems Engineer 2** to be a leader for an onsite data destruction team with the ability to work and communicate with directors and other personnel at onsite data centers and attend and participate in team project meetings as required.

Compensation and Benefits: As a member of the TechR2 team, you will enjoy a competitive salary at \$40-50,000 with bonus potential and a competitive benefits package that includes medical, dental, vision insurance; AD&D insurance; 401K, paid time off, educational training reimbursement, and opportunities for advancement.

If you possess a background in IT and computer systems engineering and have high level of confidentiality, professionalism, integrity, and industry knowledge and are willing to ensure the best practices across all scope of the role, we want you to join our team!

Key Responsibilities of System Engineer 2:

- Assess & estimate the wiping and degaussing of electronic devices as required by the client relations team.
- Make the required entries in the Onsite Project Management system for assigned projects.
- Follow procedures while onsite to prepare for and close out a project.
- Train System Engineers 1 and cross train people who are System Engineer 2 as required.
- Work with and assign engineering personnel in executing data destruction duties.
- Assist in the development of new procedures for data destruction.
- Maintain security, backup, and redundancy strategies.
- Operate automobiles and/or box trucks, whether owned or rented by TechR2.
- Complete additional duties as required.

Additional Knowledge, Skills, and Abilities:

- Proficient with Microsoft Office Suite including writing and displaying reports in Microsoft Word, Excel and PowerPoint as required.
- Ability to use instructions and guidelines to perform the functions of the job.
- Ability to act with integrity, professionalism, and confidentiality.

Essential experience:

- Qualified systems engineers will have a background in IT, computer systems engineering, or systems engineering and analysis.
- Pass System Engineer 2 exams for auditing, degaussing, solid state, storage servers and team management at 95% or above.
- Pass required industry standard certifications required for data center security operations.

Credentials and Education:

- High School Diploma or GED.
- Have a valid government issued driver’s license.
- Can operate motor vehicles.
- Ability to operate forklift, manual pallet jack, and small hand tools.

Work Environment/Physical Requirements:

Ability to regularly sit, stand, walk, stoop, kneel, reach and bend. Ability to lift, lower and carry up to 50 pounds. Ability to travel up to 50% of time. No barriers to entry into other countries. COVID vaccination (travel restrictions), background check and drug testing required. Passport required.

PLEASE NOTE THAT WE ARE PARTNERING WITH GO-HR TO FILL THIS POSITION. Please send cover letter and resume to info@GO-HR.biz. Any inquiries to TechR2 will be directed to GO-HR.
